

Australian Native Blend

A low phosphorus, 8-9 month controlled release nursery and landscape fertiliser. It is derived from a blend of polymer coated NPK, slow release urea and potassium sulphate. Suitable for all plants requiring potassium and nitrogen, particularly phosphorus sensitive species.

Minimum Guaranteed Analysis W/W%

Application Calendar

(best applied during growing season)

AVAILABLE 20KG + BULK BAGS

Low P Formula

Ideal for phosphorus sensitive species, Australian Native Blend was developed for growers of the Proteaceae family, including species such as Banksia, Grevillea and Hakea.

High Potassium

The high potassium quality makes plants more robust, improves frost, disease and drought resistance and increases water use efficiency.

Advanced Coating

Polymer coated component ensures precise release of nutrients via diffusion, regulated by soil temperature. It is unaffected by soil moisture, pH and microbial activity

Prolonged Nutrition

Controlled release fertiliser offers 8-9 months of consistent nutrient delivery, providing prolonged nutrition for native plants.

Application Rates

Contact your Bailey's Representative for further details.

Top dress for landscapes use 30 grams per square metre.

Incorporation 5kgs per cubic meter

Potted plants, 5g per 140mm pot, 10g per 200m pot, 30g per 300m pot
