

Seasorb

A premium, non-ionic, block co-polymer penetrant wetting agent and soil conditioner boosted with kelp, humic and fulvic acid. This concentrated and fast acting formulation provides an immediate curative effect to hydrophobic soils while enhancing plant health, root development, germination and beneficial microbial activity

Application Calendar

(best applied during growing season)

Soil Structure Enhancement

The combination of wetting agent and organic acids helps improve soil structure, fostering aeration and root development.

Stress Reduction

The comprehensive formulation helps support plants in coping with environmental stressors, enhancing their resilience.

Root Zone Health

The wetting agent, coupled with organic acids, promotes a healthy root zone environment, facilitating nutrient absorption and microbial activity.

Combined Power

The key elements in Seasorb, creates a harmonious effect, fostering optimal conditions for plant growth by enhancing water absorption, nutrient availability and boosting overall soil health.

Application Rates

Contact your Bailey's Representative for further details.

RATE/Ha	DILUTION	FREQUENCY
50-80L	1:5 Water	Bi-monthly

Apply at higher rate for greater curative action. For best results apply every 2 months in the growing season, September - May. Irrigation is not required after application at the recommended rate.
