

LAWN REVIVER™

A premium lawn soil for top dress or pre plant, designed to improve soil profile and boost turf growth. Contains red loam, Grosorb® wetting agent, slow-release nitrogen and finely screened mature compost. Boosts growth, colour, soil fertility and water holding capacity. Use straight from the bag with no further additives required.

APPLICATION RATES

Top Dress rate/m ²	Frequency
5-10mm	Biannually

After mowing, verti-mowing or scarifying, spread Baileys Lawn Reviver over the surface of the lawn. Work into the leaf mat using the back of a rake & water well.

Top-dress at least annually, preferably in mid-spring & autumn

MATURE, SCREENED ORGANICS

Finely screened, mature compost improves moisture and nutrient retention, stimulates microbes and earthworms.

RED LOAM

A fine red sand, high in silt and clay improves water retention and soil profile.

GROSORB WETTING AGENT

A premium wetting agent improves water penetration and soil wettability. Reduces run-off and dry patch.

SLOW RELEASE FERTILISER

Provides your lawn with a slow release feed of nitrogen, boosting growth over 3 months..

Heavy product. Two person lift.

AVAILABLE: 25L, 1m3 & BULK
