# SOIL IMPROVER PLUS

Soil Improver Plus is a mature organic compost designed to build up soil structure and improve soil fertility. When added to existing garden soils it provides the essential organic carbon needed for microbial life and improves the soil's capacity to retain water and nutrients. Use when adding new plants to any garden or raised bed.

## APPLICATION RATES

Use Baileys Soil Improver Plus when preparing all soil types for new plantings.

- Light sandy soils – Distribute 150mm evenly over the surface.
- Medium soils – Distribute 100 to 150mm evenly over the surface.
- Heavy soils – Distribute 50 to 100mm evenly over the surface. Dig in and water well.

**AVAILABLE: 25L, 1m3 & BULK**

## COVERS AND PROTECTS

Making it easier for plant roots to grow by providing them with better access to nutrients, water and oxygen.

## FULLY COMPOSTED

It's stable and won't strip nutrients from your plants to facilitate the breakdown of immature organic material.

## GROSORB WETTING AGENT

A premium wetting agent improves soil wettability, even moisture penetration and drainage.

## NATURAL NUTRIENT SOURCE

The addition of fully composted chicken manure enriches the soil to support plant growth.
