

# INDOOR PREMIUM POTTING MIX

Baileys Indoor Premium Potting Mix is a quality growing media, specifically designed to reduce the stress of transplant, assist establishment and ensure vigorous and healthy growth for indoor plants. This professional blend of ingredients has undergone extensive research and development to perfect a light weight mix with optimal water holding capacity, air filled porosity and drainage.

**GROSORB  
WETTING AGENT**

**WETTABILITY  
& DRAINAGE**

**COIR &  
HUSK**

**AERATION  
& WATER  
RETENTION**

**CONTROLLED  
RELEASE**

**FEEDS FOR  
9 MONTHS**

**TRACE  
ELEMENTS**

**GROWTH  
& DISEASE  
RESISTANCE**

**KELP &  
HUMATES**

**VIGOR  
& ROOT  
GROWTH**

## DESIGNED FOR INDOOR CONDITIONS

**Fully Composted:** It's stable and won't strip nutrients from your plants to facilitate the breakdown of immature organic material. The composting process also ensures no weed seeds or plant pathogens come with the product.

**Contains Controlled Release Fertiliser:** Two types of controlled release fertiliser, a 3-4 month and an 8-9 month have been added to this mix to ensure the perfect balance of nutrient release as required.

**Contains a Quality Wetting Agent:** Grosorb® has been added to the mix to ensure good moisture penetration, even drainage and re-wettability.

**Contains Coir and Coir Husk:** These natural and renewable fibres retain water well and ensure the mix doesn't dry out too quickly in indoor conditions. The husk in particular holds water while not feeling damp and creates pockets of air and good drainage for a healthy root system.

## AVAILABLE 15L, 1M<sup>3</sup> BULK BAGS & BULK

**Contains Kelp:** Two forms of kelp have been added to this mix to promote root growth and vigour after transplant. The many minerals, vitamins and enzymes from the kelp improve pest, disease and stress resistance and overall plant health.

**Contains Trace Minerals:** A broad spectrum, mineral rich micro-nutrient fertiliser is added to the mix to supply all plant required nutrients for strong growth in both a soluble and slow release form. High Silica produces strong cell walls and improves insect and heat tolerance.

Baileys Indoor Premium Potting Mix is manufactured to Australian Standards 3743 for a Premium Grade Potting Mix.

## APPLICATIONS

Baileys Indoor Potting Mix is ready to use straight from the bag and perfect for growing most plants, in particular a broad range of popular indoor varieties including climbing and trailing plants, palms, ferns, succulents and flowering varieties. Apply directly into pots, planters and containers.
