

Tree Planting Mix

Provide new plantings with the best start using Baileys Tree Planting Mix. Designed with locally sourced, sustainable inputs, it enhances both growth and rooting to aid tree establishment. Two forms of water saving materials have been added to combat WA's dry climate.

Application Calendar

use all year round

Promote Root Growth

Red loam enriches tree planting mixes, fostering healthy roots and overall growth. Kaolin clay enhances soil moisture retention, stabilising roots for improved water and nutrient absorption.

Water Saving

Grosorb wetting agent enhances water penetration and distribution promoting efficient tree root hydration. Water-saving crystals conserve water, providing sustained hydration for 6-9 months.

Beneficial Biology

Biowish biology introduces beneficial microorganisms to the soil, enhancing nutrient availability, soil structure, and overall tree health by fostering a balanced ecosystem.

Steady Supply of Nutrients

8-9 month controlled release fertiliser ensures a steady supply of nutrients over an extended period, supporting continuous growth and vitality in newly planted trees.

Application Rates

Contact your Bailey's Representative for further details.

For individual planting of shrubs and trees, use as a planting mix around the root zone. Incorporate with existing soil or backfill at a ratio of 20-50%.

For general landscaping, spread a 10mm thick layer across the soil surface and incorporate to a depth of 50mm. Water thoroughly before planting.
