

WATCH HOW TO

Brilliance

Lawn Food

Baileys Brilliance is formulated to boost growth and colour quickly. Containing high nitrogen, potassium, iron and manganese for lawn growth and deep green colour.

It is phosphate free, making it safe for application to lawns around rivers and waterways.

APPLICATION RATE

| Rate/m ² | Frequency |
|---------------------|-----------|
| 25-50 grams | 6-8 weeks |

Calculate the required amount of fertiliser

$$\text{Rate} \times \text{Lawn Area in M}^2$$

Apply evenly by hand or spreader.
We recommend applying with a fertiliser spreader for even coverage.
Water in well.

8KG TREATS UP TO 320M²

DEEP GREENING

High iron and nitrogen greens lawns by increasing the production of chlorophyll, the green pigment that gives plants their colour. Iron is also essential for photosynthesis, the process by which plants convert sunlight into energy.

FAST ACTING

All nutrients in Brilliance are soluble and readily plant available, resulting in quick uptake, greening and growth.

PHOSPHATE FREE

Brilliance is phosphate free and safe for application around ponds and waterways where eutrophication and harmful algae blooms are a concern.
