

3.1.1. PLUS WATCH HOW TO

Lawn Food

Designed for warmer months Baileys 3.1.1. Plus contains premium levels of turf nutrients formulated specifically for WA conditions.

The granulated mini prill is easy to apply, ensures even coverage and quick uptake.

APPLICATION RATE

Rate/m ²	Frequency
25-50 grams	6-8 weeks

Calculate the required amount of fertiliser

Rate x Lawn Area in M²

Apply evenly by hand or spreader.
We recommend applying with a fertiliser spreader for even coverage.
Water in well.

MINI GRANULE

Mini size, fully granulated granule for easy and even distribution and quick uptake, even on finer turf surfaces.

BOOSTS GROWTH & COLOUR

A complete macro and micro nutrient fertiliser for excellent results on high profile turf surfaces such as entertaining areas.

SAVES WATER

Contains wetting agent Grosorb which is waterwise accredited. This ensures water is absorbed into the soil enabling nutrients to be channelled into the root zone. Producing a healthy, drought tolerant lawn.

8KG TREATS UP TO 320M²
