

Clay and Compost

An all-in-one soil conditioner for permanent amendment of sandy, hydrophobic soils. With kaolin clay, silts, rock minerals, and mature compost, it enhances soil's nutrient and water-holding capacity while naturally regenerating fertility. These premium ingredients create a loam like soil texture, promoting lush, healthy gardens and nutrient-dense food production. It is the ideal soil preparation product for new lawns, gardens and vegetable beds based on sandy soil.

Application Calendar

use all year round

Kaolin Clay

Kaolin clay amends sandy soils by increasing water retention, enhancing soil structure, and providing essential minerals for plant growth.

Mature Compost

Mature compost enriches soil by adding organic matter, improving soil structure, increasing nutrient availability, and fostering beneficial microbial activity.

Organic Fertilisers

Silts, and rock minerals enhance soil fertility and biological activity by providing essential nutrients and promoting microbial diversity.

Holds Water

Kaolin clay increases soils water-holding capacity by creating fine particles that absorb and retain moisture, preventing rapid water loss.

Application Rates

Contact your Bailey's Representative for further details.

For Garden Beds & Lawns prepare the area by removing all weeds, rocks and debris. To achieve a soil clay content of 5% distribute one bag of Baileys Clay & Compost evenly over 1m². Work well into the top 100mm with a rotary hoe or garden fork. Water well.

For Tree & Shrub Planting spread 1-2 bags over 1m² and mix to a depth of 200-300mm. Dig a hole twice as large as the root ball, plant and backfill with amended soil. Water well.
